SUMMARY

Senior software engineer at FavoriteMedium. Prime focusing on high performance web services design and development, and have experience on frontend technologies such as jQuery and AngularJS. Have experience on architecting and implementing E-Commerce website.

Formerly HPC scheduler software LoadLeveler developer at IBM, have 4 years experience on Linux development. Was focusing on task assignment and Linux network related areas.

Having been using and maintaining Linux system for more than 10 years; Development with C/C++, Ruby, Python, Golang, MongoDB, Redis, and skillful in Unix utilities such as sed. Have experience on building high scalability web services with MongoDB, Redis and Docker.

PATENT

Published patent SCHEDULING JOBS IN A CLUSTER while working at IBM, publication number is US 2010/0223618 A1

CURRENT OCCUPATION

Favorite Medium April 2012 - Present

Senior Software Engineer

- · Specialized in Ruby on Rails backend development work.
- · Build high performance services with appropriate language and technologies (Ruby, Python, Golang, Docker).
- · Basic frontend development, focusing on Javascript (jQuery, Angularjs).
- · Setup deployment automation with Capistrano
- · Setup production environment on Heroku, Amazon EC2.
- · Integeration with external web services, such as Google, Facebook, Twitter, Sinaweibo.

PAST PROJECTS AND EXPERIENCE

Steelcase Scout Apr 2015 - Present

Developer and System Operation

Steelcase Scout is focusing on solving space booking challenges caused by real estate compression and open office plans with intelligent sensor network.

- · Set up and maintain **docker** containers for system, which simplifies deployment on different environments.
- · Leader developer for **Tornado** based API server, design and implemented reserve, space check and admin API.
- · Design database schema for mobile app, sensor data and big query log.
- · Build Jenkins server for code continuous integration.
- · Test server load with **Gatling** tool, and optimize code with test result.

Starcount Feb 2013 - Present

Starcount (http://www.starcount.com/) is focusing on calculating popularity for stars over multiple social networks. By tracing the score and activities on the website, user can get better known of different stars. Project contains main site, mobile app, CMS and data collector.

- · Architect and leader developer for backend part (data collecting and processing, CMS).
- · Design and implement CMS with **Ruby on Rails** for account info management.
- Replace third part calculation and query service with ElasticSearch and Python scripts, help customer to reduce cost.
- Design MongoDB schemas and indeies to optimize data fetching, reduce query time up to 50%.
- Refactor web crawlers from Ruby to **Golang**, which inceases the performance and reduces node used from **30** to **6**
- · Introduce **Redis** for long cycle tasks, which brings better user experience in CMS.

LoadLeveler Apr 2008 - Apr 2012

Staff Software Developer (From Jun 2011)

Being responsible for development and design for LoadLeveler product. Have participated several features such as configuration enhancement, IPv6 support, task migration and dynamic resource usage modification, which provides support for running in large cluster such BlueGene. Also being respond to system administrator for development cluster environment.

Wenpod Distribution Platform

Aug 2014 - Sep 2014

Full Stack Developer

Part-time

Wenpod distribution platform (http://shop.wenpod.com/stores/855435/) is a full functional e-commerce distribution platform, which provides distributor management, store isolation, balance management and other functions for distribution.

- · Architect and implement the database schemas.
- Architect and implement the distribution service structure and backend admin panel.
- · Integrate Alipay as payment service.

Five Cooking E-Commerce Site

Mar 2013 - Sep 2013

Full Stack Developer

Part-time

Five cooking is a e-commerce website which focusing on providing processed vegetable for office workers. This is a full functional E-Commerce website and can provide general function such as cart, balance management, membership point, promotions for user, and a complete admin panel for adminstraor.

- · Architect and implement the database schemas.
- · Architect and implement e-commerce service.
- · Architect and implement frontend pages and backend admin panel.
- · Integrate Alipay as payment service.

EDUCATION

Beijing University of Posts and Telecommunications

Sep 2005 - Apr 2008

M.S., Signal and Information Processing

Beijing University of Posts and Telecommunications

Sep 2001 - Jun 2005

B.S., Information Engineering

Online Education • Mining Massive Datasets (Coursera), SoA with Distinction.
